

July 10, 1983, p. 4

@HS+M certifier on which Laura was to (and did) write the names of the members in her fancy calligraphic hand. Very nice of her. I must thank her in person when she returns from Cottrell Lake. Ann and I visited for about 30 minutes and then she drove me into town. Not long after I arrived here, RJT phoned and came up and we went up on the roof and took photographs -- particularly of City Hall. I enjoyed the picture-taking session very much. We then went down to Muster Donut and drank coffee. I took seven pages of notes as RJT talked about breakers + collieries and coal companies.

RJT took with him the first two rolls of film that I took with my new camera -- one roll of Plus X and one roll of Kodachrome. He will have them developed by Dave Pearson, from whom I bought the camera.

RJT reported that he spoke with Austin Burke of the Scranton Chamber of Commerce about the Gravity Shops. RJT and I will meet at the News at about 1 PM tomorrow and go over to the "Y" and see if we can not locate Bifano in order to let him know what actions we are taking on behalf of the Gravity Shops.

When I was at the Golf Course, WSP reported that JVB and a friend of his <sup>his cousin Paul</sup> stopped at the Golf Course last night. How curious.

The secret of life is in art. The secret of art is in life. The secret of life is in art. The secret of art is in life. The secret of life is in art. Zikuth.
